

EXECUTION

- ◆ ISO 5468
- ◆ Special cutting edge geometry
- ◆ Diamond-ground carbide tip
- ◆ Universal drill bit with MS5 helix
- ◆ High-temperature brazing at about 1,120°C
- ◆ Special cutting helix with micro surface hardness
- ◆ Ground surface

COMPATIBLE SDS-PLUS UNIVERSAL DRILL BIT

The HTT is suitable for almost all materials to be drilled due to the special cutting edge geometry and the diamond-ground cutting surfaces of the carbide tip. The very hard tungsten-titanium carbide tip makes the drill bit extremely wear resistant.

W5 spiral for ergonomic and ecological work flow

- ★ High drilling speed
- ★ Fast transport of drilling dust
- ★ High grade of stiffness and long service life
- ★ High resistance against Breakage

Comments

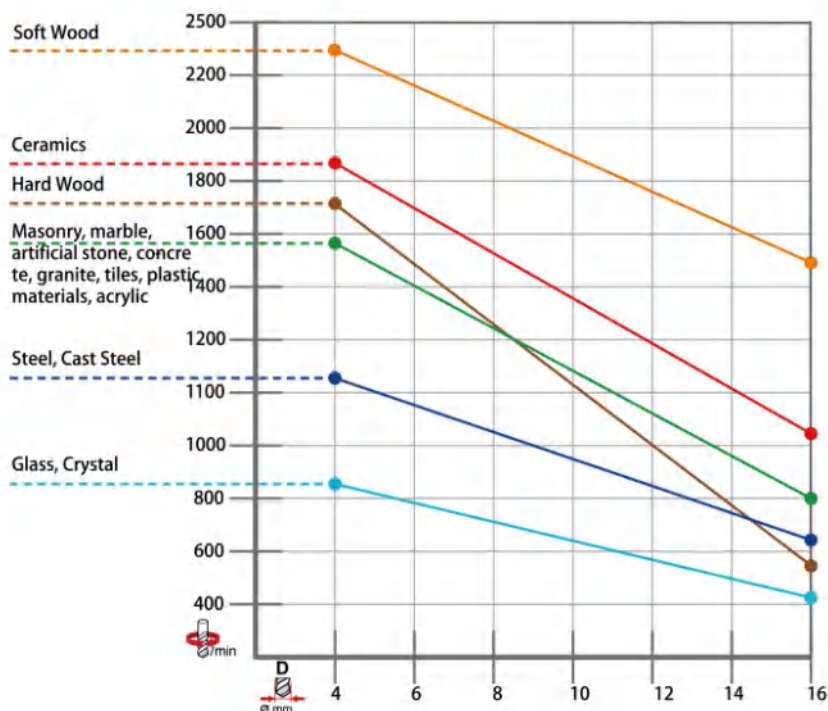

- ★ Regrinding of the carbide tip becomes necessary during prolonged use
- ★ Higher wear of carbide tip when drilling in abrasive materials
- ★ Only use sharp drill bits for drilling in porcelain, ceramics, glass
